### The Tavistock Trust for Aphasia's Aphasia Software Finder: Aphasia Apps

"This website has information about software programs and apps for people with aphasia in the English language. We aim to help people with aphasia to find software that may be useful to them."

<http://www.aphasiasoftwarefinder.org/aphasia-apps> 

## Application Companies

### Lingraphica

Offers two types of Apps for personal and therapeutic use, respectively: "SmallTalk Communication and Practice" and "TalkPath Speech Therapy Apps."

<http://www.aphasia.com/products/apps/> 

### Locabulary

"Locabulary is an iPhone app developed for communication, information, and fun. Words are made available based on your GPS location. With Locabulary, you can easily speak the right words in the right place."

<http://locabulary.com/> 

### SpeakinMotion (VAST)

"VAST is an innovative application of video technology to facilitate and improve communication abilities for speech-impaired individuals. Following close-up video of mouth movements allows these individuals to speak full sentences. The simultaneous combination of visual, auditory and, in some cases, written cues, allows these individuals to readily produce speech."

<http://www.speakinmotion.com/> 

### Tactus Therapy Solutions

Tactus Therapy Solutions specializes in apps for adult rehab, bringing evidence-based therapy to the touch-screen with respectful and intuitive design.

<http://tactustherapy.com/> 

### TapGram

Social Media/Communication App for persons with aphasia.

<http://tapgram.com/>
